Subject: RE: Readers Proof of SETAC Pellston - Pesticide Risk Assessment for Pollinators - chapters attached

Mace/ Tom/ Dave,

This arrived out of the blue into a busy workplan and I have missed your deadline. I am sure it is fine but warrants a review in my opinion and I would like to tic- tac with Mace on it too.

Thanks for your work on it but please can we have an extension?

Regards, Mike

Subject: Readers Proof of SETAC Pellston - Pesticide Risk Assessment for Pollinators - chapters attached

Dear Steering Committee Members,

At long last, the page proofs are here. I have attached **the chapters** to this email, and will send the rest (**appendices**) in a moment. These proofs provide you with an opportunity to review your manuscript, respond to any unanswered queries (i.e., comments in the margins of the proof), and check for accuracy. Make your revisions directly on the page proofs and do not send back a revised manuscript. Answers to any of the copyeditor's queries are also to be made to the proofs directly.

You will need to have Adobe Acrobat Reader software to read page proofs. This is free software and is available for user downloading at:

<http://www.adobe.com/products/acrobat/readstep2.html>.

With your review of these proofs:

1. You are being asked to review the chapter for which you were the lead author, including the appendix that may be directly associated with your chapter. All chapters are being sent to you, in the event you want to review, either in whole or in part, other parts of the manuscript. (For those chapters for which the lead author was not part of the Steering Committee, Dave and I will review them. In fact, Dave and I, and SETAC will be reviewing the whole manuscript one final time.)
2. In completing your review for your chapter, you may:
 - (i) respond to the queries in your chapter and check for corrections directly; or,
 - (ii) respond that you are comfortable with SETAC and Dave and I performing the task of reviewing the page proofs without your input. The deadline for getting all comments back to Dave and I is **Tuesday, MARCH 4**.

3. Please keep corrections to a minimum. In particular, changes that cause text to move to another page should be avoided if at all possible, as these are difficult to implement and will affect the pagination. Please note that the corrections should be marked/articulated carefully on to the proofs. Illegible or confusing marking or editing may introduce new errors.
4. Check all figures along with the text and legends. Please make sure that permission statements appear as necessary. Mark any needed changes directly on the copy.
5. This is your last opportunity to check your contribution. Updated page proofs will be made available to Dave or I after this point, they will only be made available to the publisher.
